Re: Letter of Support for Fish Habitat Improvement Projects at
Black Moshannon State Park, Centre County

Dear Mr. Thompson,

Thank you for being a valued partner in our fish habitat improvement efforts. The Bald Eagle Fishing Club has contributed generously toward fish habitat projects at multiple lakes across Centre County over the past few years. The club does an excellent job of introducing Bald Eagle Area High School students to fishing and conservation. The Pennsylvania Fish and Boat Commission fully supports the Bald Eagle Fishing Club's application for the Friends of Reservoirs small grant program. The proposed fish habitat improvement plan addresses fish and turtle habitat needs at Black Moshannon State Park. This proposal was developed with full participation from a diverse group of partners and the project is sure to be a success. If your project receives funding, our PFBC staff will provide field construction oversight, technical assistance, equipment for the project, and matching habitat material funds as available. Our PFBC in-kind match component of staff time, travel, equipment usage, and other cash expenditures would total over \$4,000 toward the proposed project. We look forward to working with you and other partners on this project as it supports the mission of the PFBC.

Yours in conservation,

A handwritten signature in blue ink that reads "Ben Page".
